

The battle of Neighborhoods Munich

Capstone Project

June 2021

- Introduction
- Business Problem
- Data Section and Methodology
- Conclusion

Introduction

Munich is a beautiful town in Bavaria, Southern Germany. There are many restaurants of all kind for ca 1.5 Mio inhabitants plus many tourists. I like to compare the 25 different boroughs in Size, Number of restaurants, Number of hotels, ...

Business Problem

- The interested audience might be an investor, landlord or Italian chef, who is looking for the best environment for success.
- Questions:
 - Is the number of restaurants decreasing in the suburbs ?
 - Where is a good place to open a new Italian Restaurant ?
 - What is the ratio Restaurants/Inhabitants ?

Data Section and Methodology

Conclusion

There are many opportunities in Munich for further Italian Restaurants.

- Is the number of restaurants decreasing in the suburbs ?
Yes
- Where is a good place to open a new Italian Restaurant ?
Oberwiesenfeld, Nymphenburg
- What is the ratio Restaurants/Inhabitants ?

The more I investigate the more I came to know the data is not reliable yet. Running out of time, but stay curious !
